Stock quantity	125,057
Region	4
Cities	10
Completed Orders	33.06%

Objectives;

- To generate a detailed product ,region and customer analysis.
- Identify potential problems to reduce low perfomance.
- Provide actionable insights and recommendation to increase productivity.

Business Insights

- Lagos Store is the best performing store but is ranked 8th city by the shop customers.
- Beauty category products is the highest revenue generating products and also the most returned category.
- Home Item 400 is the best selling products while Home category is the least performing categgory.

Recommendations

- Management should invest in increasing customers in Lagos as there is more potential in Lagos as a populated city.
- More investment on Beauty products while reasons for returns should be handled to improve customers satisfaction and reduce returns.
- Market research should be done for other home items to prevent over dependence on a category. Cross-selling with beauty products can also be done.

Risk

- About 5% of orders are being returned which could increase if not handled properly.

Opportunity

- Sales increases during december probably due to more customers movement at the time so management can pull resources to maximise the sales.
